MT PRO Submersible – Double Nozzle

Double-nozzle dispenser for submersible (STP) systems

- NMDPRA-compliant
- Calibrated before delivery
- Assembled & tested in Nigeria
- Spare parts always available

Built for stations running submersible turbine pump systems, and built to last. It combines Bennett metering, solenoid-valve control and a CPU-controlled board for smooth, reliable pressurised dispensing. It serves two vehicles at once with two Bennett meters, two solenoid valves and double CPU control. Calibrated to ± 0.3% with 7-year memory storage and 10-minute battery backup so your data is never lost, assembled and tested in Nigeria, and serviceable anywhere with parts always available.

Compatible fuels	PMS, AGO or DPK

TECHNICAL PARAMETERS	
Nozzle	2
Hose	2
Display	4
Pulser	2
Bennett meter	2
Solenoid valve	2
Power board	2
CPU	2
Reset board	2
Totalizer	2

OPERATING CONDITIONS	
Meter accuracy	± 0.3%
Memory & backup	7-yr storage · 10-min backup
System type	Submersible (STP), pressurised

SPECIFICATIONS

Nozzle	O.P.W 1" · blue or red guard
Hose	4m flexible, wire reinforced, oil resistant, 1" dia.
Hose hanger	Attached to the frame, retractable
Control valve	In-line valves
Meter	4-piston positive displacement · aluminium alloy frame
Totalizer	Electronic / mechanical, visible from outside
Frame	White with illuminated top ring (other colours on request)
Money calculating range	000-00009999.99 MU
Register range	000-00009999.99 / L
Unit price setting range	000-0009999.99 / L
Totalizer range	0.009,999,999.99 L
Memory storage & backup	10-minute backup · over 7 years memory storage
Security	Electronic
Manual	Maintenance and installation included
