CNG Daughter Station (Skid Station)

Complete pipeline-independent CNG station · receive, store & dispense

NMDPRA-compliant | Certified installation technicians | Supplied & installed by MEGA-TEC | Nationwide support

The daughter station is how you bring CNG to places the pipeline doesn't reach. This complete skid-mounted station receives high-pressure gas delivered by trailer, stores it on-site, and dispenses it to vehicles, no pipeline connection required. Every component is engineered to work together safely, and for investors opening CNG sites ahead of the pipeline network, it is the fastest route to market. Supplied, installed and commissioned by MEGA-TEC.

Gas	CNG

TECHNICAL PARAMETERS	
Offloading dispenser	1 · two pressure lines
Refilling dispenser	1 · three-line, double nozzle
CNG compressor	1 · 1200 Nm³/h, 380V
Cylinder group	1 · 180L × 36 pcs (6,480L)
Leakage alarm system	1
PLC management system	1

OPERATING CONDITIONS	
Compressor type	Hydraulic reciprocating
Intake pressure	3 to 20 MPa
Max exhaust pressure	25 MPa
Compression	2-level
Cylinder working pressure	25 MPa

SPECIFICATIONS

Cylinder group volume	180L × 36 = 6,480L · high : medium : low = 1 : 1 : 1
Alarm system	Combustible gas detectors · sound & light alarms · linked emergency shutdown
PLC control	Fully automatic operation by storage pressure & temperature · data records & report printing
Compliance	NMDPRA-compliant installation
