CNG Storage Tubes (40ft)

High-pressure container tube storage · up to 7,800 Nm³

NMDPRA-compliant | Certified installation technicians | Supplied & installed by MEGA-TEC | Nationwide support

Reliable high-pressure storage is the backbone of any pipeline-free CNG station, and these 40ft tubes are built to last. Each 12-tube container holds up to 7,800 Nm³ of CNG at 20–25 MPa, tested to 33.4 MPa for safety, and engineered for a 20-year working life. Whether paired with a daughter station or expanding your existing storage, they keep your gas secure and your station running.

Gas	CNG

TECHNICAL PARAMETERS		OPERATING CONDITIONS	
Tubes per container	12	**Working pressure**	20 to 25 MPa
Single tube water volume	2,540L	**Max testing pressure**	33.4 MPa
Total water volume	30.48 m³	**CNG capacity**	Up to 7,800 Nm³ at 25 MPa
Container size	12.87m × 2.44m × 1.98m	**Filling weight**	5,800 kg CNG at 25 MPa
Empty weight	34,500 kg	**Working life**	20 years

SPECIFICATIONS	
Configuration	40ft container tube group with wheels basement
Application	Daughter stations · on-site storage expansion · gas transport
Compliance	NMDPRA-compliant installation
