LPG Filling Scale

Electronic weight-based cylinder filling scale · PLC controlled

NMDPRA-compliant | **Calibrated before delivery** | **Assembled & tested in Nigeria** | **Spare parts always available**

Accurate cylinder filling is the heart of any LPG retail operation, and the MEGA-TEC LPG Filling Scale is built to get it right every time. It fills and weighs cylinders automatically, from 5kg up to 50kg depending on model, with weighing accuracy to ± 0.1% of full scale, helping gas plants and outlets dispense fairly, protect margins and keep customers confident in every refill. Supplied and installed by MEGA-TEC across Nigeria.

Gas	LPG

TECHNICAL PARAMETERS	
Filling method	Automatic, weight-based
Control system	Microprocessor / PLC controlled
Filling mode	Automatic, semi-automatic or manual
Cut-off valve	Automatic solenoid valve
Filling nozzle	LPG quick coupling nozzle
Load cell	Explosion-proof, high-precision

OPERATING CONDITIONS	
Filling capacity	5kg – 50kg LPG cylinders (model dependent)
Max weighing capacity	100kg – 150kg
Weighing accuracy	± 0.1% of full scale
Filling accuracy	± 0.2% to ± 0.5%
Operating pressure	0.7 – 1.8 MPa (7–18 bar)
Power supply	AC 220V ±20%, 50Hz (110V optional)
Operating temperature	-20°C to +50°C

SPECIFICATIONS	
Resolution	10g – 20g
Ambient temperature	-25°C to +55°C
Relative humidity	5–95% (non-condensing)
Construction	Carbon steel frame, stainless steel weighing platform
Explosion protection	Ex-proof electrical components for hazardous areas
Safety features	Auto shut-off · overfill protection · emergency stop · leak prevention
Optional communication	RS232 / RS485 / Ethernet
Optional accessories	Barcode scanner · printer · RFID · cylinder database · filling management software
