

LPG Filling Scale

Electronic weight-based cylinder filling scale · PLC controlled

NMDPRA-compliant

Calibrated before delivery

Assembled & tested in Nigeria

Spare parts always available

Accurate cylinder filling is the heart of any LPG retail operation, and the MEGA-TEC LPG Filling Scale is built to get it right every time. It fills and weighs cylinders automatically, from 5kg up to 50kg depending on model, with weighing accuracy to $\pm 0.1\%$ of full scale, helping gas plants and outlets dispense fairly, protect margins and keep customers confident in every refill. Supplied and installed by MEGA-TEC across Nigeria.

Gas

LPG

TECHNICAL PARAMETERS		OPERATING CONDITIONS	
Filling method	Automatic, weight-based	Filling capacity	5kg – 50kg LPG cylinders (model dependent)
Control system	Microprocessor / PLC controlled	Max weighing capacity	100kg – 150kg
Filling mode	Automatic, semi-automatic or manual	Weighing accuracy	$\pm 0.1\%$ of full scale
Cut-off valve	Automatic solenoid valve	Filling accuracy	$\pm 0.2\%$ to $\pm 0.5\%$
Filling nozzle	LPG quick coupling nozzle	Operating pressure	0.7 – 1.8 MPa (7–18 bar)
Load cell	Explosion-proof, high-precision	Power supply	AC 220V $\pm 20\%$, 50Hz (110V optional)
		Operating temperature	-20°C to +50°C

SPECIFICATIONS

Resolution	10g – 20g
Ambient temperature	-25°C to +55°C
Relative humidity	5–95% (non-condensing)
Construction	Carbon steel frame, stainless steel weighing platform
Explosion protection	Ex-proof electrical components for hazardous areas
Safety features	Auto shut-off · overfill protection · emergency stop · leak prevention
Optional communication	RS232 / RS485 / Ethernet
Optional accessories	Barcode scanner · printer · RFID · cylinder database · filling management software
